INTRODUCTORY COMMENTS

25 This Reply under 37 C.F.R. 1.111 is in response to a non-final (and first) Office Action mailed January 30, 2004. Please amend the above-identified patent application in accordance with the directions set forth below.

Claims 1-17 were pending and were rejected in the Office Action. No claims are canceled with this Reply, but claims 18-20 are newly added. Hence, claims 1-20 are presented for examination.

AMENDMENTS TO THE DRAWINGS

No Amendments to the drawings are made herein.

AMENDMENTS TO THE WRITTEN DESCRIPTION

Please replace the paragraph at page 6, lines 29-32 with the following
paragraph:

A

5 The storage systems could be RAID systems with controllers, tape libraries, and/or Just Bunch ~~eO~~ Of Disks (JBOD) in a shelf. Sometimes, the storage could be even a single disk connected to the SAN. It is possible that one or more hosts (servers) could have storage 110 that is directly attached to it instead of the SAN.

A

10 Please replace the paragraph at page 8, lines 4-13 with the following
paragraph:

A

15 The SAN has heterogeneous devices 213, 214, 215 such as switches, hubs, routers, storage, and others. Some of the storage devices 213 may be directly attached to the host while most of the devices 214 and 215 are attached to the SAN.
Each device supports an interface to communicate with it, but these interfaces are not standardized. For example, a switch provides SNMP protocol for control, command and management. On the other hand, some storage devices provide SCSI protocol for management. Still other devices provide a command line interface (CLI) for management. ~~Some e-devices~~ Some devices, such as switches, provide HTML protocol interface. A device that provides SNMP support will have an SNMP agent and associated MIB(s).

Please replace the paragraph at page 11, lines 12-16 with the
following paragraph:

- A3*
- During day-to-day day-to-day operation, one or more devices in the SAN may encounter errors and status changes. Some of these have to be logged for management and record keeping as well as later use by the SAN administrator or field service personnel. Some errors, such as failures of devices, may need the immediate attention of the SAN administrator and hence the administrator has to be notified immediately.
- 5 During day-to-day day-to-day operation, one or more devices in the SAN may encounter errors and status changes. Some of these have to be logged for management and record keeping as well as later use by the SAN administrator or field service personnel. Some errors, such as failures of devices, may need the immediate attention of the SAN administrator and hence the administrator has to be notified immediately.
- 10 During day-to-day day-to-day operation, one or more devices in the SAN may encounter errors and status changes. Some of these have to be logged for management and record keeping as well as later use by the SAN administrator or field service personnel. Some errors, such as failures of devices, may need the immediate attention of the SAN administrator and hence the administrator has to be notified immediately.
